TECHNICAL DATA SHEET

HANSMOL BX POWDER

Nature : Sodium Dibutyl Naphthalene Sulphonate

CAS Number : 25417-20-3

Specification: Form : Solid, free flowing powder

Appearance : Off white to light yellowish powder

pH value (1:10) : 6.0 to 9.0 approx

Solubility : Completely soluble in water.

Solid : Minimum 95 %

Active matter : Minimum 70 %

Moisture content : Maximum 5 %

Ionicity : Anionic

Properties: HANSMOL BX is hygroscopic. Therefore it must be stored in its original sealed packaging. If stored properly in its original sealed packaging the shelf life is at least 12 months.

HANSMOL BX is an anionic surfactants, wetting and emulsifying and foaming, and the proliferation of sexual fine. Naphthalene and butanol by condensation after sulphonation, and were derived. Chemistry information about 2,6-di-tertbutylnaphthalene sulphonic acid sodium salt is IUPAC name: Sodium 3,6-dibutylnaphthalene-1-sulphonate. Moderately toxic by ingestion and subcutaneous routes. When heated to decomposition it emits toxic fumes of oxide of sulphur and carbon.

Application: HANSMOL BX the goods are excellent penetration, wetting and emulsification, proliferation and foaming properties. The acid and alkali resistance, resistance to hard water, resistance to salt, adding a little salt can be greatly increased penetration thoroughly edge. Widely used textile industry process road, mainly for thoroughly infiltrated agent and wetting agent, can be used as a detergent, help agent, dispersant such as pesticides and herbicides.

HANSMOL BX is a more commonly used in the widening powder. For textiles, dyeing, leather and paper industries, as well as pesticides, herbicides, such as the wetting agent, paint and ink industries dispersant, synthetic rubber industry such as emulsifiers. HANSMOL BX is a anionic surfactant. Yes alkyl aryl sulphonate with about 20 % of the inorganic salt.

HANSMOL BX is used as a heavy duty household cleaning agent after formulation such as a glass and bottle washing compound, a metal polish and scouring compound, a floor Cleaner and floor wax remover.

HANS CHEMICALS PRIVATE LIMITED

Regd. Off: 407, Panchsheel -2A, Raheja Township, L.S. Raheja Cross Road No.3, Malad- East, Mumbai-400097, Maharashtra, India.

HANSMOL BX is widely used in the Agro chemistry. It's used as a raw material to manufacturing of various herbicides & pesticides molecules like that Terbutryn.

Packing: HANSMOL BX powder is available in 20 kg & 25 kg HDPE & Paper bag. Alternative packing sizes may be available upon request.

Pollution Reducing & Environment friendly.

This information is based on our present state of knowledge and its indented to provide general notes on our products and their uses. It should not therefore be constructed as guaranteeing specific properties of the products described on suitability for particular application.
